

Professional Tools. Exceptional Value. Zero Compromise.

Everything you need from the brands you trust.

Electrical Test Equipment

Accurate Diagnostics for Modern Electrical Systems

Reliable measurement tools are essential for diagnosing electrical systems safely and efficiently. AutomationDirect offers high-quality electrical meters and testers from trusted brands including Wiha, Southwire, and Ardent. Designed for accuracy and durability, these instruments provide dependable performance in industrial environments.

Capabilities

- AC/DC voltage measurement
- Current measurement
- Resistance and continuity testing
- True RMS accuracy for VFDs and non-linear loads

Specialized Options

- Clamp meters for non-contact current measurement
- Insulation testers for cable integrity verification
- Continuity testers for rapid fault detection

Tool & Tray Sets

Complete Tool Solutions for Every Trade

Pre-configured tool sets eliminate the guesswork of building the right kit. Choose from compact screwdriver sets to comprehensive electrician kits containing up to 192 pieces. These kits are designed to ensure technicians always have the right tool on hand for installation, maintenance, and troubleshooting tasks.

Key Features

- Trade-specific tool selections
- Durable foam tray organization systems
- Tool pouches, belts, and carrying cases
- Easy storage and quick access to every tool

For more specifics on the complete lineup, visit:

- [Tool Sets Buying Guide](#)

Screwdriving Tools

Precision and Power for Every Fastening Task

AutomationDirect provides a wide selection of industrial-grade screwdriving tools engineered for reliability and performance. Choose from trusted brands including Wiha, Wera, Weidmuller, and Megapro, offering solutions for everything from heavy-duty industrial work to precision electronics.

Available Options

- Standard screwdrivers
- Insulated drivers for electrical work
- Multi-bit driver systems
- Precision drivers for electronics
- Torque-controlled drivers

For more specifics on the complete lineup, visit:

- [Screwdrivers Buying Guide](#)

Bit Drivers, Bits, & Adapters

Versatile Bit & Adapter Sets

Bit and adapter sets provide complete, versatile solutions for professional use. Bit driver sets available include:

- Impact-rated bits for power tools
- Profiles: Phillips, Slotted, Torx, Pozidriv, Square, and more
- Rapid-change adapters for fast bit swaps
- Magnetic holders for one-handed operation
- Socket adapters for tight spaces

- [Bit Drivers, Bits, and Adapters Buying Guide](#)

Professional Tools. Exceptional Value. Zero Compromise.

Everything you need from the brands you trust.

Stripping & Crimping Tools

Reliable Wire Preparation Every Time

Designed for professionals who demand smooth, damage-free insulation removal and consistently secure crimps, these tools support a wide range of wire sizes, insulation types, and application needs.

With trusted brands like CHANNELLOCK, JOKARI, Southwire, Wiha, Weidmuller, and AutomationDirect, you get stripping and crimping tools that are perfect for professionals who require repeatable, high-quality terminations.

Features

- Automatic stripping mechanisms
- Ratcheting crimp systems for consistent results
- Interchangeable crimp dies
- Ergonomic anti-slip handles

For more specifics on the complete lineup, visit:

- [Wire Stripping Tools Buying Guide](#)
- [Wire Crimping Tools Buying Guide](#)

Pliers & Cutting Tools

Strength, Precision, and Reliability

AutomationDirect offers a comprehensive range of pliers and cutting tools designed to meet the demands of professional technicians. Products from brands such as Wiha, Weidmuller, CHANNELLOCK, Southwire, and more, deliver exceptional durability and performance.

Tool Types Included

- General purpose pliers
- Precision pliers
- Wire and cable stripping tools
- Crimping pliers and dies
- Cutting pliers and cable shears
- Knives and scissors
- Jumper cutting tools
- Pipe and tube cutters
- Hose clamp pliers

For more specifics on the complete lineup, visit:

- [Pliers Buying Guide](#)

Heated Tools

Heat Control & Performance

Soldering irons, soldering guns, and heat guns provide reliable, high-performance heat for electrical, mechanical, and fabrication tasks.

Additional Accessories

- Interchangeable soldering tips
- Heat-shrink reflector nozzles
- Spreader and reducer tips
- Adjustable stands for bench operation

Applications

- Electrical repairs
- Wire assembly
- Heat-shrink tubing applications

- [Heated Tools Buying Guide](#)

L-Keys & T-Handles

Portability & Comfort

Available in metric and imperial sets, with options for hex, Torx, and specialty profiles. Choose from standard L-keys, fold-out sets for portability, or T-handles designed for maximum power and comfort in industrial environments. General features offered include:

- Ball-end tips for angled access
- Holding functions for improved grip
- Demagnetizing capabilities
- Hex-Plus design to reduce fastener wear
- Stubby drivers for tight spaces

Fatigue-Free Operation

T-handles feature vibration-absorbing cores and molded grips for fatigue-free operation during repetitive tasks. Dual-drive designs offer versatility for both high-torque and quick-turn applications. Compact L-key sets fit easily into tool trays and holders for organized storage and fast access.

Wrenches, Ratchets & Socket Sets

Fast and Efficient Fastening

Ergonomic ratchets and socket sets simplify fastening tasks in industrial and mechanical environments. Product features include:

- Corrosion-resistant construction
- Low return angles for tight spaces
- Direction-change mechanisms for quick adjustments
- Available in SAE and metric sizes

Wrench Selection

Wrenches help perform mechanical assembly and maintenance tasks easily and reliably. Available options include:

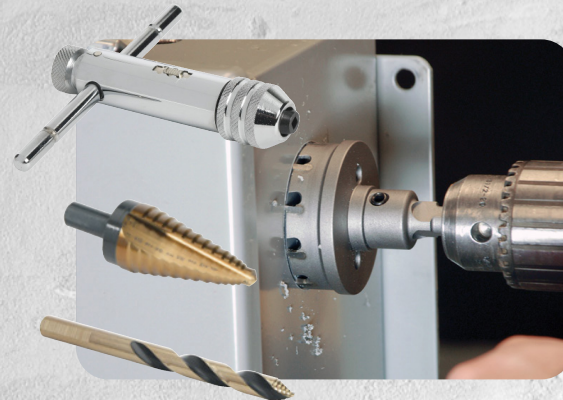

- Hex, Torx, and service keys
- Combination wrenches
- Adjustable wrenches
- T-handles and handle/bit sets

For more specifics on the complete lineup, visit:

- [Wrenches Buying Guide](#)
- [Ratchets and Socket Sets Buying Guide](#)

Hole Cutting Tools

Fast, Accurate Material Preparation

Hole cutting and knockout tools deliver fast, precise results across a wide range of applications. A full selection of drill and tap styles are available in both imperial and metric sizes.

Offering

- Step drills
- Combination drill and tap
- Drill bits
- Machine taps
- Hand taps
- Hole saws
- Knockout punches
- Deburring tools

For more specifics on the complete lineup, visit:

- [Hole Cutting and Threading Tools Buying Guide](#)

Striking Tools

Controlled Impact for Industrial Applications

AutomationDirect offers striking tools that are built to last, specifically designed for the industrial user. Offerings include modular split head mallets and robust dead blow hammers.

Available Options

- Modular split-head mallets
- Dead blow hammers

Key Advantages

- Replaceable striking faces
- Controlled impact force
- Reduced rebound
- Long service life

For more specifics on the complete lineup, visit:

- [Striking Tools Buying Guide](#)

Measuring & Layout Tools

Precision Measurement for Accurate Work

AutomationDirect offers a full range of measuring and layout tools designed to deliver the accuracy, reliability, and durability required for professional-grade work across a wide variety of applications.

Measurement Solutions Include

- Digital, vernier, and dial calipers
- Folding rulers
- Tape measure

For more specifics on the complete lineup, visit:

- [Measuring Tools Buying Guide](#)

Professional Tools. Exceptional Value. Zero Compromise.

Tool Storage

Cable Tie Tools, Knives, & Fish Tapes

Organized, Portable, and Built for the Field

Storage tailored to your needs. Backpacks for field technicians, tool rolls for compact organization, trolley cases for high-capacity jobs. These systems ensure tools remain protected, organized, and ready for use.

Storage Options

- Technician backpacks
- Tool rolls and bags
- Rolling trolley cases

Key Benefits

- Water-resistant materials
- Rugged zippers and reinforced stitching
- Impact-resistant structures
- Ergonomic handles and padded straps

For more specifics on the complete lineup, visit:

- [Tool Storage Buying Guide](#)

Cable Tie Tools

Ensure clean, secure installations with proper tension control. Built-in cutters trim excess flush. Ergonomic designs reduce strain during repetitive use for professional-looking results.

Knives

High-quality steel blades with corrosion-resistant coatings for extended life. Safety features include liner locks, comfort grips, and quick-change mechanisms for fast blade replacement.

Fish Tapes

Low-friction materials and flexible leaders provide smooth pulling through conduits. Durable polymer designs minimize binding and effort. Swivel heads improve maneuverability in complex routes.
